

CHANDRA AKASH KIRAN

JUNIOR DATA SCIENTIST | MACHINE LEARNING | PYTHON | SQL | GENAI

Bengaluru, India | c9a9kiran@gmail.com | +91 8602201879 | [LinkedIn](#) | [GitHub](#) | Open to Worldwide / APAC Remote

Enterprise GPT: [Live Demo](#) | [Repository](#)

PROFESSIONAL SUMMARY

Junior Data Scientist and Machine Learning practitioner with hands-on experience in Python, SQL, Pandas, NumPy, scikit-learn, Generative AI, LLMs, and Retrieval-Augmented Generation (RAG), supported by professional experience in data analytics and automation. Skilled in data preprocessing, exploratory data analysis, feature engineering, imbalanced classification, model evaluation, threshold optimization, vector search, and AI application development. Built fraud-detection models using Logistic Regression and Random Forest, achieving 97.81% ROC-AUC and 82.54% F1-score, and developed a full-stack Enterprise GPT RAG application using LangChain, Gemini, OpenAI, ChromaDB, FastAPI, Next.js, and Supabase. MTech in Computer Science with experience processing 100K+ records and translating analytical results into actionable insights.

TECHNICAL SKILLS

Programming & Data: Python, SQL, Pandas, NumPy, PostgreSQL, Excel, Jupyter

Machine Learning: scikit-learn, Logistic Regression, Random Forest, SMOTE, Classification, Feature Engineering, Model Evaluation, Threshold Optimization

Data Science: Data Cleaning, Data Preprocessing, EDA, Statistical Analysis, Data Validation, Imbalanced Data, Confusion Matrix, Precision, Recall, F1-score, ROC-AUC

GenAI / Applied AI: LLMs, RAG, LangChain, Google Gemini, OpenAI, Prompt Engineering, Embeddings, ChromaDB, Vector Search, AI Agents

Visualization & Apps: Matplotlib, Plotly, Power BI, Tableau, Streamlit, Dashboard Development

Data Engineering & Backend: ETL, REST APIs, BeautifulSoup, Selenium, Web Scraping, FastAPI, Supabase, AWS S3

Cloud & Development: Vercel, Render, Git, GitHub

MACHINE LEARNING, GENAI & DATA SCIENCE PROJECTS

Enterprise GPT - AI Knowledge Assistant | *Python, FastAPI, LangChain, Gemini, OpenAI, ChromaDB, Supabase, Next.js, RAG*
[Live Application](#) | [GitHub Repository](#)

- Built and deployed a full-stack Enterprise AI Knowledge Assistant using Retrieval-Augmented Generation (RAG) to answer natural-language questions from uploaded PDF documents.
- Developed an end-to-end pipeline for PDF ingestion, text extraction, chunking, Gemini embeddings, ChromaDB vector storage, semantic retrieval, and context-grounded LLM generation.
- Integrated LangChain agents and multi-LLM support for Google Gemini and OpenAI, enabling tool-based enterprise document retrieval and source-aware responses.
- Implemented Supabase Authentication, PostgreSQL, and Storage for secure user access, document metadata, chat sessions, conversation history, and file management.
- Designed user-specific document retrieval and relational data models; deployed the Next.js frontend on Vercel and FastAPI backend on Render.

Credit Card Fraud Detection | *Machine Learning | Python, Pandas, scikit-learn, Streamlit*

- Developed and compared Logistic Regression and Random Forest classifiers for fraud detection on a highly imbalanced credit-card transaction dataset.
- Performed preprocessing, feature analysis, class-imbalance handling with SMOTE, model evaluation, and classification-threshold optimization.
- Selected a Random Forest model achieving 94.55% precision, 73.24% recall, 82.54% F1-score, and 97.81% ROC-AUC at an optimized threshold of 0.68.
- Built a Streamlit dashboard to communicate predictions, transaction patterns, model performance, and risk insights.

Zomato SQL Capstone | *Data Modeling & Business Analytics | PostgreSQL, SQL*

- Designed a normalized relational database for customers, restaurants, menus, orders, payments, deliveries, and reviews with primary and foreign-key relationships.
- Applied JOINS, aggregations, CTEs, subqueries, and window functions to analyze revenue, customer behavior, restaurant performance, and delivery efficiency.
- Translated query outputs into insights for customer segmentation, operational improvement, and data-driven decision-making.

PROFESSIONAL EXPERIENCE

Data Analyst Intern | GrowthPaay | Indore, India | Jan 2023 - Jul 2023

- Collected structured and unstructured data using Python, BeautifulSoup, Selenium, and REST APIs for analysis and reporting.
- Processed, cleaned, and validated 100K+ records using Pandas and NumPy, creating analysis-ready datasets and improving data usability.
- Developed SQL queries and automated reporting workflows, reducing report-generation time by 40%.
- Performed exploratory data analysis to identify trends and anomalies and communicated structured findings to stakeholders.

System Engineer | Natrinai Technology Pvt. Ltd. | Chennai, India | May 2019 - Jun 2020

- Developed Python scripts for data extraction, processing, validation, and reporting workflows, reducing manual effort by 50%.
- Analyzed test results, application logs, and defect data to identify recurring patterns and support root-cause analysis.
- Built Python automation using Selenium and Robot Framework; applied exception handling and data-quality checks to structured datasets.

Data Operator | Planning and Statistical Department | Dhamtari, India | Oct 2014 - Mar 2016

- Managed, cleaned, and validated large government datasets using Excel and prepared reports with Pivot Tables and data-processing techniques to support statistical decision-making.

EDUCATION & CERTIFICATIONS

MTech in Computer Science - MATS University, Raipur, Chhattisgarh | 2013 - 2016

BE in Computer Science - CSVTU, Bhilai, Chhattisgarh | 2010 - 2013

Certifications: IBM Data Science Professional Certificate (Coursera) | Data Analytics Training & Certification (Masai School) | Python for Data Science and Machine Learning (Udemy)
